Math 9 – Unit 1 Review and Reflection

General Operations and Number Sense

Please submit with your test after completion.

In this box, you may write any patterns, formula, tips, tricks, self-made examples, etc. that you remember that may help you on the upcoming unit test. This sheet will be assessed on your ability to reflect on and summarize the material learned in this unit.

Reflection Assessment:

Competency	Emerging	Developing	Proficient	Extending
Reflects on Mathematical Thinking	I analyze my thinking with help. I identify simple strategies but struggle to explain why they work. I need support to reflect on my choices.	I analyze my thinking and identify some strategies I used. I attempt to justify my choices but may need help to explain my reasoning.	I analyze my thinking clearly, identify patterns, and explain my strategies. I justify my choices with logical reasoning and some examples.	I analyze my thinking deeply, connect ideas in creative ways, and explain how different strategies help solve problems. I justify my choices with strong reasoning and real-world examples or patterns.
